

2ND NATIONAL ECD STAKEHOLDERS CONFERENCE

By Tobias Opiyo & Sr. Esther Wachera

Date: July 25, 2018

SCORE ECD II Project

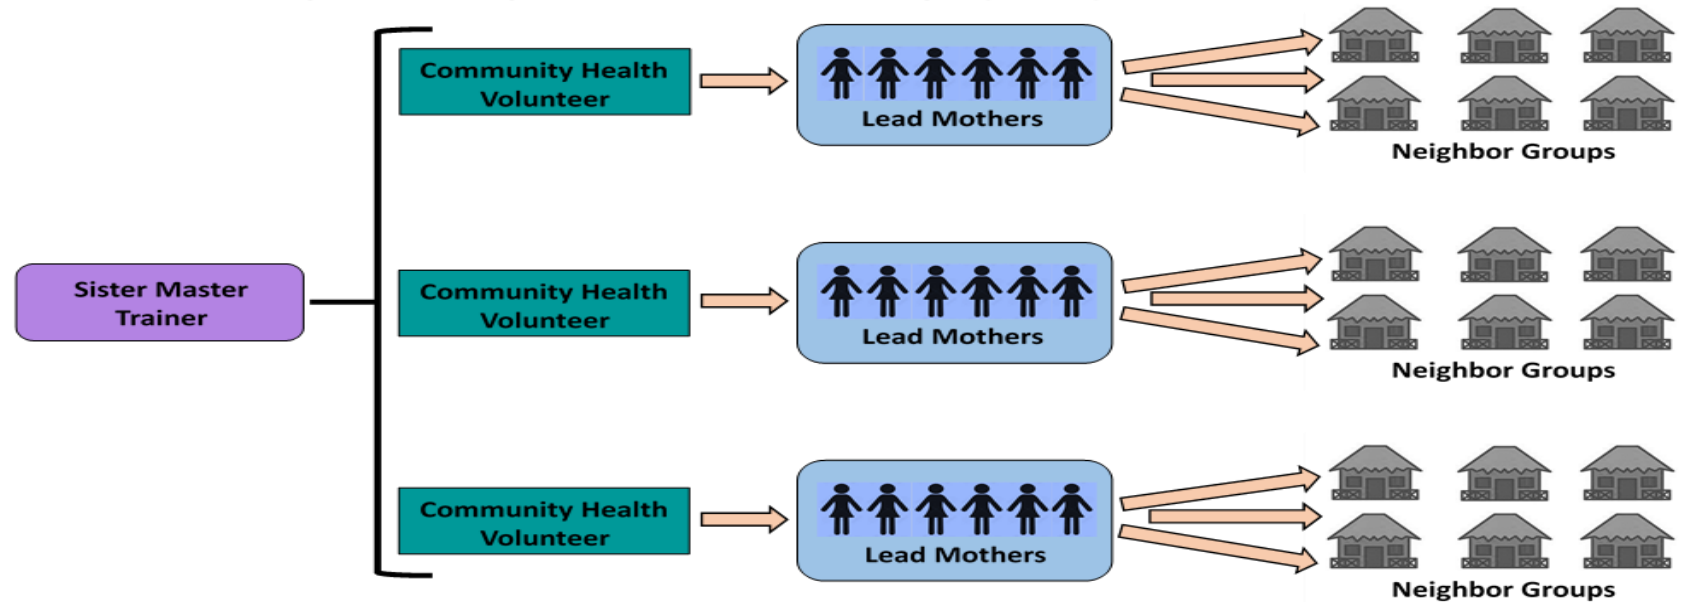

faith. action. results.

SCORE ECD Brief

- ❑ Strengthening the **C**apacity **O**f **R**eligious Women in **E**CD
- ❑ Funded by Conrad N. Hilton Foundation (Oct 2017 – Sep 2021)
- ❑ Partners: AOSK + 9 Congregations implementing in 16 Counties
- ❑ Target: Children <1,000 days, Pregnant & Lactating Mothers
- ❑ To date 1,565 sisters and 4,160 Caregivers have been reached with various messages on components of Nurturing Care

Care Group Model: Platform to access Hard-to Reach Areas

Adapted Care Group Model for the SCORE-ECD Project (Phase 2)

Sister Master Trainers
 Each Sister Master Trainer will supervise 3 or 4 Community Health Volunteers (CHV). The Sister Master Trainers will provide supportive supervision to the CHVs for implementation of the Mothers and Babies Course (MBC) and the iECD curriculum

Community Health Volunteers
 Each Community Health Volunteer (CHV) will supervise 6-8 lead mothers. The CHVs will implement the iMBC/ECD directly to the NG groups. They will supervise the implementation of the iECD curriculum by the lead mothers.

Lead Mothers
 Lead mothers are the members of Care Groups. They are pregnant or lactating women who are selected by their communities for this position. During the Care Groups, CHVs train the lead mothers on how to deliver the iECD curriculum. Each Care Group should have between 6-8 Lead Mothers.

Neighbor Groups
 Neighbor Groups (NG) are made up of pregnant and lactating women. There is a lead mother for each NG. The iMBC/ECD is delivered at this level by the respective CHVs. Lead mothers lead NGs though the iECD curriculum during group sessions and home visits.

Care Group Session in Progress

Sisters conducting a home visit

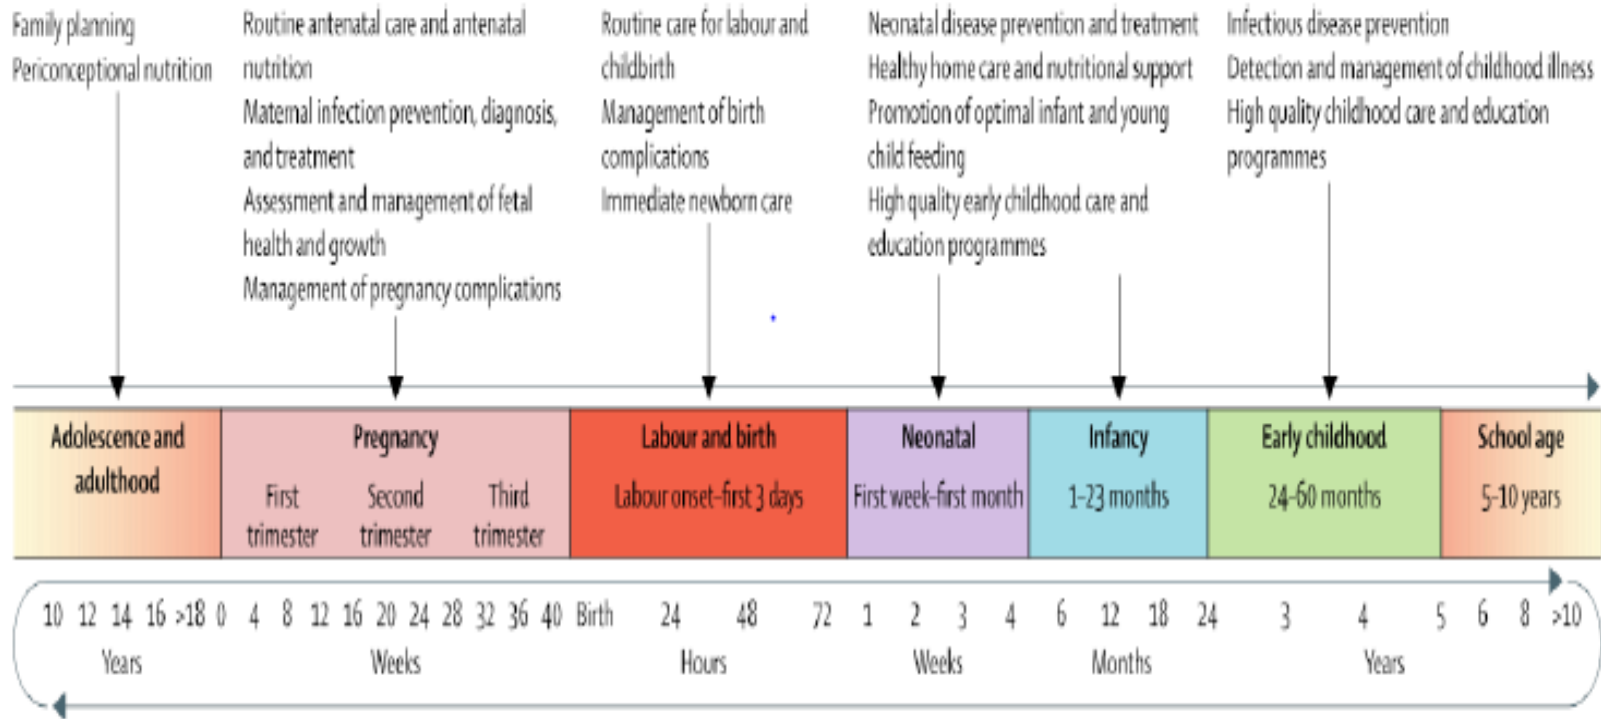

Sisters promoting age-appropriate play both at school and home using locally available play materials

CRS Alignment to Global Frameworks

Life Course Approach Interventions
